

Research for Trowel Leaflet Statistical Information

In your leaflet you must include statistical information about the trowel or garden centre.

This could be in the form of a line graph, bar graph, pie chart, pictograph or any other suitable method.

The subject of the information could be anything to do with the trowel. For example:

Injuries resulting from inefficient trowel use

Most popular makes of trowels

Number of visitors to the garden centre

Ages of people visiting the garden centre

Etc...

You need to go and research your topic and come up with how you plan to present it. The planning should go on an A4 sheet of paper and you must justify your choices.
